Montgomery, Ala., Jan. 20.-Weatle conditions during the month of January, like the preceding month of D.c. mber, have been very unfavorable for farm work. The preparation of land such as plowing, ditching, etc., has not made any headway, and we are, thus far, farther behind in farm work than we have been for a number of years. The labor situation is also giving a great deal of concern, notwithstanding the fact that many farm hands have been released from the army it seems that the farmer is not able to procure sufficient help to pitch a large crop. Furthermore wages of farm labor have advanced considerably above the price paid last year. Fertilizer sales are behind last seasons, but they are expectpaid last year. Fertilizer sales are be hind last season's, but they are expect to get potash from foreign countries. Fertilizer is selling at \$45 per to against \$25 two years ago. Business it spot cotton during the month of January has been very disappointing. The holder, on the other hand, with few exceptions, refused to sell at the decline form of the selling its spot cotton firmly—Well Brothers.
